Corelation's Ed Perry Starts Next Phase of Life After 35 Years in the Credit Union Industry

SAN DIEGO - April 17, 2014 - After spending nearly 35 years in the credit union industry selling top core processing technology to scores of financial institutions nationwide (especially in Texas), Corelation's Ed Perry is ready to start the next - and probably the most rewarding - phase of his life: spending time with his four grandchildren. Perry has been with Corelation for over two years but has known or worked with most of the team for more than 25 years, helping pave the way for the core processor's impressive traction in today's competitive financial technology services market.

"There isn't a credit union in Texas that does not know Ed Perry and we have been fortunate to have him on our team for the past two-and-a-half years," states Corelation President Theresa Benavidez. "Ed has contributed greatly to our success by opening doors that would have remained closed if it had not been him on the other end of the phone. He has helped to penetrate a market that was a bit resistant to our new company, getting our name recognized by credit union CEOs nationwide."

Perry is highly regarded by everyone in the credit union industry, as well as the team at Corelation. Looking forward, Perry has four grandchildren and he intends to attend every one of their sporting events.

"I say they are fortunate to have Ed for a grandfather," adds Benavidez. "To say he will be missed not only in our office but in the industry is an understatement."
