Corelation Continues Strong Growth in Third Quarter 2026 with Credit Unions Across the Country Selecting KeyStone

SAN DIEGO - October 7, 2026: Corelation, Inc. announced that six credit unions selected its KeyStone core platform during the third quarter of 2026. These credit unions represent a cumulative total of more than \$5.4 billion in assets and 333,000 members.

The financial footprints of these credit unions range from \$144 million to \$2 billion in assets. Recently announced credit union signings include Arcadia Credit Union, Clearview Federal Credit Union, Hawaiian Financial Credit Union, HEB Federal Credit Union, TENCU, and Tyndall Federal Credit Union.

Across the industry, credit unions of varying sizes continue to evaluate how technology can help position their organizations for the future. The institutions that selected KeyStone this quarter sought a partner that could support their long-term objectives while providing the flexibility needed to adapt to changing member expectations.

Among them was Clearview Federal Credit Union, which cited strategic alignment as a key factor in its decision to partner with Corelation.

“Choosing KeyStone and Corelation was a decision that went far beyond technology,” said Lisa Florian, President & CEO of Clearview Federal Credit Union. “As Clearview continues to grow, we have to think differently about what it will take to serve our members and compete in an increasingly dynamic financial services industry. We are confident that we found the partners who understand our strategy and can help us continue moving forward.”

Clearview also pointed to KeyStone's integration capabilities and flexibility as differentiators.

“What solidified our decision was the combination of KeyStone’s modern, open architecture and Corelation’s deep understanding of the credit union industry,” Clearview’s CIO Ray George added. “The platform gives us the flexibility to integrate best-of-breed solutions, improve operational efficiency, and respond more quickly to evolving member needs. Just as important, Corelation approached the relationship as a true strategic partner, giving us confidence that KeyStone will support both our

technology strategy and our commitment to delivering an exceptional member experience for years to come.”

Tyndall Federal Credit Union emphasized the importance of equipping its team with technology designed to support innovation and member service.

“Adopting Corelation's KeyStone platform marks a defining step forward for Tyndall Federal Credit Union. By moving to a modern, person-centric core built for real-time data and open integration, we're equipping our teams with the tools to serve our members faster, smarter, and more personally – turning innovation into everyday value for the people who own this credit union,” said Chris McGee, SVP, Chief Information Officer of Tyndall Federal Credit Union.

The newly signed credit unions are scheduled to convert to KeyStone in 2027 and 2028.

“We are proud to welcome these credit unions to the Corelation family,” said Rob Landis, CEO of Corelation. “Their decisions to select KeyStone as their core processor reflects a shared commitment to innovation, service, and long-term success. We look forward to supporting their goals and building strong, lasting partnerships.”
